Professional Summary

Data Platform Engineer with 5 years of experience building scalable, cloud-native platforms across AWS and GCP. Specialized in Trino, Delta Lake, and Kubernetes, with a strong focus on data governance, automation, and performance optimization. Proven track record leading initiatives in finance and retail that boosted data discoverability and reduced operational costs. Adept at deploying open-source tools like OpenMetadata and building LLM-powered RAG pipelines to enhance documentation and metadata efficiency.

Education

Federal University of São Carlos

Bachelor Degree in Computer Engineering

- Publisher of a scientific paper

São Carlos, São Paulo, Brazil

March 2018 - September 2022

Experience

GFT Technologies

Data Platform Engineer Specialist - At Bank BMG

- Led the architecture of a large-scale data platform for Brazil's largest bank, managing petabyte-scale workloads with 99.9% SLA uptime.
- Designed AWS infrastructure (EKS, Glue, Athena) and tuned Trino clusters, cutting query costs by 45%.
- Implemented a Delta Lake framework with ACID compliance, supporting consistent, reliable data transactions.
- Built RAG pipelines using AWS Bedrock and LLMs to automate data documentation and boost catalog efficiency by 80%.
- Established a centralized governance solution with OpenMetadata, enabling automated lineage and metadata discovery across all data domains.
- **Tech Stack:** AWS (EKS, Glue, Athena, Bedrock), Trino, Delta Lake, OpenMetadata, Apache Airflow, Kubernetes.

São Paulo, Brazil

Dec 2024 – Present

Grupo Boticário

Senior Data Platform Engineer

- Designed a secure API layer to enable third-party data access directly from BigQuery.
- Developed a cloud security compliance system that increased security score from 60% to 98%.
- Created microservices to automate GitHub repository classification and Looker deployments, reducing manual workload by 80%.
- Engineered CI/CD pipelines and internal SDKs for Airflow (Composer) resources using infrastructure-as-code principles.
- **Tech Stack:** GCP (GKE, Composer, BigQuery, Cloud Run), GitHub Actions, Terraform, Python, Prisma Cloud.

São Paulo, Brazil

Apr 2024 – Dec 2024

IFF - International Flavors & Fragrances

Data Engineer

- Spearheaded automation projects in global manufacturing plants, enabling frontline workers to digitize routine workflows and improve efficiency.
- Collaborated across continents to deliver scalable ETL/ELT pipelines with dynamic schema evolution.
- Developed AutoGC application to automate gas chromatography processes, reducing analysis time by 85%.
- Built and deployed FastAPI-based microservices on Kubernetes clusters for manufacturing data solutions.
- **Tech Stack:** FastAPI, Snowflake, Microsoft SQL Server, AWS, Kubernetes, Python, Industrial Automation.

Newark, DE - US

Apr 2023 – Apr 2024

Americanas S.A.

Data Engineer

- Architected a real-time data platform leveraging Debezium and Kafka, powering customer-facing services.
- Built a high-volume integration pipeline ingesting 100M+ daily records from Google Ads API with automated failover handling.
- Implemented Infrastructure-as-Code solutions with Terraform, reducing manual errors by 90%.
- **Tech Stack:** Python, Java, Go, Terraform, Apache Kafka, Kubernetes, GCP (BigQuery, Dataflow, Cloud Run).

São Paulo, Brazil

Sept 2022 – Apr 2023

Americanas S.A.

Data Engineering Intern

- Designed and implemented a data quality framework that reduced anomalies by 75%.
- Built Kafka-based streaming infrastructure for real-time CDC and improved ETL reliability.
- Optimized Airflow DAGs and SQL queries, reducing costs by 60% and improving performance by 40%.
- **Tech Stack:** Apache Kafka, Apache Airflow, SQL, ETL/ELT Pipelines, GCP, Python.

São Paulo, Brazil

Sept 2021 – Sept 2022

Publications

Discovery of Spatial Association Rules from Fuzzy Spatial Data

São Paulo, Brazil

Federal University of São Carlos

Feb 2022 - Jul 2022

- Proposed a new method for extracting spatial association rules from *fuzzy* spatial data, analyzing data from restaurants and accommodations in New York.
- Implemented of a pipeline for data processing.
- Generated association rules that relate landmarks to accommodation and restaurant levels and prices.
- **Technical Skills:** R, Overleaf, LaTeX, SQL, Spatial Data.
- **Soft Skills:** Time management, teamwork, presentation skills, scientific report writing.

Skills

Programming and Tools	Python, SQL, Java, Go, Shell Script, R, C/C++, Git, Terraform, GitHub Actions, GitLab CI/CD, Power BI, Grafana
Cloud and Infrastructure	AWS (EKS, Glue, Athena, S3, Bedrock), GCP (BigQuery, GKE, Composer, Cloud Run, Dataflow), Kubernetes, Docker
Data Engineering and Platforms	Trino, Delta Lake, Airflow, Kafka, Debezium, Spark, Beam, Snowflake, ETL/ELT, CDC, Streaming, Data Quality, Data OpenMetadata

Languages

English	Fluent
Portuguese	Native proficiency
